

Tip of the Month...

MineSight® 3-D Command Line Options

Command line options have been available in MineSight® 3-D for some time, but with v.3.40-00 more options were added. In addition to specifying the font style and size, or the saved project mapfile (so you can restart in exactly the same spot where you left off from the previous session), you also can specify the type of MineSight® 3-D license that you want to execute (e.g., exploration, survey, visualizer, or volume).

Just type, `ms3d.exe -h` at the command line and the following dialog will be displayed. It shows the exact syntax to use for the options you are interested in using.

Announcing Mini-Seminars in South America!

Peru

Arequipa, Peru
 Sept. 16-17, 2005
 Location TBA
 Registration
 Deadline: Sept. 2, 2005
