

MINESIGHT® BASIS MODELING

MINESIGHT BASIS PROGRAMS FOR MODELING

OVERVIEW

MineSight Basis programs for building, managing, and basic interpolation of 3D block, stratigraphic, and gridded surface models

KEY FEATURES

- > Initialize and manage MineSight 3D block, stratigraphic, and gridded surface model files
- > Create, edit, report model files
- > Compress models for efficiency
- > Statistical and geostatistical analysis
- > Back estimation
- > User calculations
- > Store and extract values
- > Generate surfaces
- > Code from boundaries
- > IDW interpolation
- > Trend plane search interpolation
- > Gradient interpolation
- > DTM operations
- > Contouring
- > Partials between surfaces
- > Display models in MineSight 3D
