

MINESIGHT® 3D GEOLOGY CAD

MINESIGHT 3D FUNCTIONS FOR GEOLOGY

OVERVIEW

Advanced geology functions in MineSight 3D including the Geomap Tool, Geomap Editor, and True Thickness Tool.

KEY FEATURES

⊙ GEOMAP TOOL AND GEOMAP EDITOR

- > Advanced geomapping capability
- > Easy digitizing of geologic and structural features: lines, symbols, labels, rulers
- > Face mapping using textured surfaces
- > Pre-defined set of standard geologic symbols
- > Customizable line and symbol definition

⊙ TRUE THICKNESS TOOL

- > Generate seam/vein geometry based on drillhole composites and codes
- > Assign seam/vein dips
- > Construct seam/vein polygons automatically
- > Account for true thickness of dipping geologic units relative to intersecting holes
