

# MINESIGHT® BLAST CUT ADJUST

MINIMIZE YOUR LOSSES

## OVERVIEW

Adjusts grade control classification boundaries based on blast movement input for more accurate grade control and mining in the pit.

## KEY POINTS

- ⊙ Multiple blast movement indicator input types
- ⊙ Minimize ore loss
- ⊙ Minimize dilution
- ⊙ Horizontal and vertical vector calculations

## KEY FEATURES

- > Bi-directional data flow with MSAxis Drill & Blast
- > Provides a basis for blasting analysis in conjunction with MSAxis Drill & Blast
- > Muck pile profiling based on blast type and explosives information
