

# MINESIGHT® AXIS MATERIAL MOVEMENT

ALL YOUR OPERATIONAL MATERIAL MOVEMENT NEEDS FROM DESIGN TO REPORTING

## OVERVIEW

Detailed production tracking by cut, truck, or shovel, when Fleet Management data is available. Track mined material and determine broken reserves.

## KEY POINTS

- ⦿ Equipment management
- ⦿ Material tracking
- ⦿ High-level modeling functionality
- ⦿ Plotting
- ⦿ Web-based maps, charting, and reporting
- ⦿ Highly scalable
- ⦿ Site-specific tailoring

D A T A S H E E T

## KEY FEATURES

- > Easy import of all planning and grade control data
- > Bi-directional data flow to the MineSight Planning Database
- > Automated updating of data from third-party systems
- > Automated data release to third-party systems
- > Automated interface to Fleet Management Systems
- > 3D graphical display of output
- > Production status tracking
- > Misclassified material tracking
- > Recalculation of material attributes for production units
- > Broken muck inventory
- > Production metrics for KPI's
- > Production advance tracking
- > Timely revision to plans based on actual
