

MINESIGHT® INTERACTIVE PLANNER-MATERIAL MANAGER

ROUTE MATERIAL TO MEET PRODUCTION OR MILL GOALS

OVERVIEW

MineSight Interactive Planner-Material Manager provides short-term planners with a canvas as unique as their scheduling needs. A dynamic interface puts users in the thick of the action, creating and managing destinations on a canvas display.

DATASHEET

KEY POINTS

- ⦿ Creates numerous physical material destinations, limiting by total capacity, opening balance, and period throughput limits
- ⦿ Route material by period.
- ⦿ Define stockpiles and reclaim options, including first in/first out, last in/first out.
- ⦿ Perform custom calculations as materials progress from mine to final product.
- ⦿ Configurable Summary presents a table and chart of destination totals (grade, tonnes, truck hours, etc.) as well as calculated fields per period while making cuts.
- ⦿ Integrates with MineSight Haulage
- ⦿ Includes the Advanced Reporting and Charting Tool, MineSight's new reporting interface.
