

**May 26, 2011**

**DATABASE VERSION RECOMMENDATION**

Microsoft ended its non-extended support for SQL server 2005 on April 11, 2011. Mintec will continue to support SQL server 2005 based MineSight installs until June 30, 2012. Mintec strongly recommends all new client-installs use SQL server 2008.

The 2011 Update CD and MineSight v7.0 will be SQL Server 2008 recommended and SQL Server 2005 required.
